

Steno Thursdays Global

New treatment options for kidney disease in diabetes

After 20 years of unsuccessful attempts to combat diabetic kidney disease, we finally have positive outcome studies with multiple agents reducing renal and cardiovascular events. These new options and the new KDIGO global guideline to ensure implementation will also be discussed.

Prof. Peter Rossing, Chief Physician
Steno Diabetes Center Copenhagen

Time **October 8, 14:15-15:00 (CET)**

Location **Steno Diabetes Center Aarhus (live stream) or via Zoom**

Registration **bit.ly/StenoThursdays_Rossing**
